Pharma solutions for tomorrow, today.

Play it safe. And watch the benefits add up.

Protecting against syringe needle accidents has never been more critical. In the United States, for example, the government has regulations to help prevent careless needle mishaps, and as every healthcare professional knows, safety concerns are by no means limited to the U.S. alone.

An increase in chronic diseases like diabetes and other illnesses that require ongoing home treatment is also fueling a worldwide demand for safer injections, both self and professionally administered. As a result, in homecare and traditional healthcare treatment settings alike, the need for preventing syringe needle accidents is increasingly important – and problematic.

But why worry? Vetter now offers assembly services for your syringe safety devices and pen/auto-injectors. Ensuring safe needle practices has never been easier. Or more convenient.

One solution. Multiple benefits.

With Vetter's assembly services, you can virtually eliminate your syringe needle safety and compliance concerns. Our services include the assembly of:

- Your safety device for single-chamber syringes with staked needles. Prefilled syringes are delivered inside their safety devices.
- Your auto-injector. Auto-injectors come with a syringe or cartridge inside.
- Your pen. Pre-assembled pens arrive with a cartridge already placed inside.

As a one-stop resource for your manufacturing and assembly needs, Vetter not only helps you prevent serious needle accidents, we also deliver the level of quality that has made the Vetter name synonymous with excellence in aseptically prefilled injection systems.

More than filling.

For more than 25 years, Vetter has provided clients with innovative pre-filled injection solutions. As a strategic partner, we support clients in the pharmaceutical and biotechnology industries in every phase of production.

From product development to market launch and post-launch phases, Vetter is more than a manufacturer of prefilled injection products. We are a value-added partner that can help you drive quality, customer satisfaction and profits.

To learn more about Vetter, including our safety device assembly services, contact your Vetter representative today.
