

Prefilled Water for Injection Syringes.

**VETTER HAS
THE SOLUTION.**

Inject your WFI products with a faster time to market.

If your new product requires prefilled Water for Injection (WFI) syringes, Vetter has the solution and the value-added benefits to support end-user convenience for reconstituting lyophilized products. Our WFI syringe combines Vetter's expertise in providing aseptically prefilled solutions with the superior quality of West's primary packaging components.

As one of the world's leading providers of aseptically prefilled injection solutions, Vetter will not only manage all of your manufacturing needs from start to finish, we can also help you achieve a significantly faster time to market.

With Vetter, you can focus on the products you have invested so much time and money in to develop, while we help to manage your manufacturing processes with superior levels of quality and service. Why settle for a watered down solution? Vetter has the experience and expertise to support your next WFI product launch.

Stability. Quality. Convenience.

Vetter works directly with your team to provide you with a turnkey manufacturing solution. This includes validation and stability data for your WFI applications.

All stability data complies with USP, PH.Eur, Ph.J and ICH guidelines, and registration documents are readily available in CTD format for Europe, Japan and numerous other countries. A Drug Master File is also available for US submission.

Additional features include:

- Extended shelf life (4-year target)
- Premium quality packaging materials
- Tamper evidence function
- Stable pH value

More than filling.

For more than 25 years, Vetter has provided clients with innovative prefilled injection solutions. As a strategic partner, we support clients in the pharmaceutical and biotechnology industries in every phase of production.

From product development to market launch and post-launch phases, Vetter is more than a manufacturer of prefilled injection products. We are a value-added partner that can help you drive quality, customer satisfaction and profits.

To learn more about Vetter, contact your Vetter representative today.

- Reduced leachables
- Coverage of entire fill range from 0.5–3ml
- Multiple dossier usage capabilities

And much more. For additional information on how our Water for Injection services can accelerate your new product launch, please contact Vetter today.

Dilute the competition.

NOT YOUR TIME TO MARKET.

With Vetter, your WFI product rollout can benefit from:

- Faster time to market
- Superior compliance standards
- Precise dosage facilitation
- Lifecycle management support
- End-user convenience

More importantly, you will benefit by partnering with a market leader that doesn't compromise on quality and service.
