

About us

For more than 25 years, the name Vetter Pharma–Fertigung GmbH & Co. KG has been synonymous with high quality aseptically pre–filled application systems. As a strategic partner, we support clients from the pharmaceutical and biotechnology industries in every phase of production, from product development through to successful product launches and commercial manufacturing. We are an independent company without any pharmaceutical products on the market. This means we can guarantee our partners absolute loyalty – as a conflict of interests is impossible right from the start.
