

# With Vetter – always a syringe–length ahead

Based on our many years of experience in the design, implementation and validation of the total filling process of aseptically pre–filled syringe systems, our Vetter Solutions division has developed pre–filled application systems along with the associated production processes. Owing to their high quality, our innovative systems have received multiple international packaging awards from the pharmaceutical industry.

Use our patented application systems to your products market advantage:

***Vetter Lyo–Ject®***

***V–LK®***
