Microbiologist Ref.-Nr: 36061

Contract: Full Time

Working hours: see description

Vetter is an international specialist in the production of aseptically prefilled syringe systems, cartridges and vials. We are a family-owned, independent company and do not manufacture our own drugs. Our focus is on providing highly skilled support and state-of-the-art manufacturing resources - we are a Contract Development and Manufacturing Organization (CDMO) supporting our customers from the initial phases of clinical development and regulatory approval process through successful product launch, commercial manufacturing, and life cycle management.

The company has production sites in Germany and the U.S., as well as sales offices in Singapore and Japan.

Responsibilities:

Performs microbiological environmental monitoring in a pharmaceutical manufacturing clean room environment

Conducts Microbiological analysis, documentation and assessment of the results

Tasks:

- Responsible for sampling, testing and review of process utilities (e.g. nitrogen, compressed air, pure steam, WFI)
- Responsible for conducting and reviewing of routine product in process and finished product tests (sampling, monitoring, LAL, GPT) according to SOPs
- Conducts and reviews environmental monitoring and sampling within manufacturing areas
- Ensures, documents and prepares materials needed to conduct above tests with respect to expiration dates
- Responsible for execution of Laboratory Investigations and Change controls
- Responsible for cleaning, maintaining and calibrating devices and equipment
- Responsible for disinfecting lab, LF Hoods, autoclave, incubators and other lab equipment's
- Collaborates with contract laboratories whom carry out microbiological testing
- Responsible for training of colleagues in the Microbiological department, as well as interdepartmental trainings such as hygienic behavior and gowning qualifications
- Ensures that all tasks are conducted in compliance with all safety, environmental protection and cGMP regulations
- Responsible for ordering lab consumables and inventory control
- Responsible for maintenance and enumeration of cryo cultures, ATCC cultures and Biological indicators
- Duties, responsibilities, and activities may change or new ones may be assigned at any time with or without notice.

Requirements:

Bachelor's degree in Biological sciences / Microbiology

Knowledge of Quality Management systems
